— WHEN ORDERING PARTS —

Since each component part is indicated by block, definitely specify both the corresponding Fig. No. and part No. within the Fig. when placing an order for it.

I. FEATURES OF THIS MACHINE

1. The game packs in excellent features capturing the hearts of players.
2. The lever control system is simple to handle.
3. At the flick of a dip switch, you can select among extended play, the number of laser guns and time of appearance of an additional laser gun, etc.
4. High score for the day is always displayed on the screen.
5. Finely designed cabinet and fascinating acoustic effects.

II. HOW TO HANDLE AND MAINTAIN THIS MACHINE

1. Since the UNIVERSAL's COSMIC ALIEN employs a color TV receiving set, be careful not to shake it during transit and when carrying it about.
2. Install it at a location which is not exposed to direct sunlight. In order to prevent the inside temperature rising, avoid as much as possible a location near a heater, etc.
3. Since the grounding terminal is visible, be sure to connect it to a grounding conductor.
4. Insert the power cord into the outlet and turn on the switch.
5. Even if the solid-state module seems to be out of order, do not check the circuit by means of a circuit tester, etc., since the internal voltage of the tester, etc. may sometimes break down the IC.
6. Make sure the machine is well ventilated. If the temperature of the IC and transistor is lower than 60°C, they function normally and may be considered reliable. If it exceeds 60°C, their performance cannot be guaranteed.
7. Make sure that the connector, etc. is not disconnected.
8. Whenever connecting the power cord of the solid-state module to, or disconnecting it from, the outlet, be sure to turn the power off.
9. Although the products of UNIVERSAL are manufactured with the utmost care, they may develop malfunctions when used for long periods. So, be sure to check this machine daily.

III. HOW TO PLAY

1. Drop in a coin when playing by yourself. Drop in two coins when playing with a friend.
2. When pressing either one- or two-player button after inserting a coin or two, the game starts. Play it by handling a lever for moving the space ship from side to side a FIRE button.
3. Aliens floating high in the air suddenly roll, rushing towards the spaceship to assault it. While warning aliens don't launch missiles, assaulting aliens do when they get near the spaceship — or they hurtle into it.
4. Each time 2 screens have been cleared (or on the 3rd screen) or when 4 screens cleared (or on the 5th screen), the aliens' shape changes and, at the same time, the spaceship comes nearer the aliens by one stage. Your spaceship is then sometimes exposed to the danger of being crashed into from behind by aliens which have dived, making the game even more exciting.
5. The present screen's number is displayed on the bottom right.
6. Aliens are either a chief, guards, commanders or soldiers, and they each have own mode of assault and points awarded. When an assaulting alien is hit, a double score is awarded compared to when the same alien is hit while warning. Every time the screen is cleared, the score level rises.
7. The number of points to be awarded when the assualting chief alien is hit, is set differentially. That is, if you hit him while assaulting alone, you are awarded a higher score than when you hit him while being escorted by the guards. If you destroy the three guards and chief alien during one diving attack round, you are awarded the highest score.
8. When only one alien remains on the screen, he changes into an immense alien rushing to assault the spaceship.
9. From the 7th screen on, the aliens are able to dodge the assaulting missiles of the spaceship — their assaulting pattern also changes. From the 10th screen on, these changes are even more accelerated, making screen clearance increasingly difficult.
10. You are given 3 spaceships for one game. If your score exceeds 5,000 points, you are awarded a reserve spaceship. (The starting number of spaceships and points over which a reserve ship is awarded, can be changed by dip switches.)

IV. NOMENCLATURE OF EACH PART

A. NOMENCLATURE OF CABINET PARTS

Fig. 1-1 Nomenclature of Cabinet Parts

B. DRAWING OF CIRCUIT BOARD MOUNTING POSITIONS

Fig. 2-1 Circuit Board Mounting Positions

Main circuit board and its container

Fig. 2-2 Side View of Circuit Board Mounting Positions

C. POSITIONS OF DIP SWITCHES AND VOLUME CONTROLLER KNOBS

Fig. 3-1 Positions of Dip Switches

a) Setting the option (dip switches)

COSMIC ALIEN is designed to have various operations set by the ON-OFF combinations of the dip switches. When starting a game, choose any desired game option and set the dip switches accordingly.

1. Setting the required score for an additional spaceship:

(Dip switches SW1, 2)

Score	SW1	SW2
5,000 pts	OFF	OFF
10,000 pts	ON	OFF
15,000 pts	OFF	ON
(No bonus addition)	ON	ON

(Set at 5,000 points when shipped)

2. Setting the game charge: (Dip switches SW3, 4)

Credit	SW3	SW4
1 coin 1 play	OFF	OFF
1 coin 2 plays	ON	OFF
2 coins 1 play	OFF	ON

3. Setting the number of spaceships:

Number of spaceships	SW5
3	OFF
5	ON

(Set at 3 spaceships when shipped)

4. Change-over setting of the mode of game (SW6):

The game may be enjoyed either as an upright or table type.

(When used as a table type for 2-player action, the table turns over.)

For upright use ON

For table use OFF

b) Volume controller knobs

Fig. 3-2 Positions of Volume Controller Knobs

c) Fuses in the power unit

Fig. 3-3 Fuses in the Power Unit

V. TV MONITOR

A. ADJUSTMENT OF TV PICTURE SCREEN

Since the TV picture screen has been factory-adjusted to optimum conditions at the time of shipment, it needs no adjustment as a rule. If it should by chance need adjustment, adjustment is possible to some extent by manipulating the knobs which appear in the wiring drawing (22").

VI. PARTS CATALOG

A-1 COMPONENT PARTS RELATED TO CABINET (OUTSIDE)

Fig. 4-1 Component Parts Related to Cabinet (Outside)

OUTSIDE CABINET PARTS LIST

Ref. No.	Name	Ref. No.	Name
1	Title panel	11	Title panel fixture
2	Illustrated glass A	12	Caster
3	Illustrated glass B	13	Coin slot
4	CRT	14	Main door
5	Cash box door	15	Push button (1 player)
6	Sticker for game rules	16	Push button (2 players)
7	Push button (Fire)	17	Operating indication panel
8	Cabinet proper	18	Control lever (general name)
9	Knob 32-Dim.
